

One step before launching;

What happened this month?

In early June 2023, the consortium of the GENTE project convened in the captivating city of Nicosia, Cyprus, to embark on an extraordinary Learning, Teaching, and Training Activity. This fascinating event, expertly hosted by the Cypriot partner Center for Social Innovation (CSI Cyprus), provided the perfect backdrop for the consortium to delve into an exciting endeavor. Their objective? To pilot the GENTE e-learning online platform, consisting of seven modules.

With meticulous attention to detail, the consortium thoroughly tested the platform, carefully evaluating various aspects to ensure an exceptional user experience. This encompassed assessing the interface design, intuitiveness, and user-friendly features, while also measuring the platform's effectiveness in achieving predetermined learning outcomes, supported by thorough research. Furthermore, they scrutinized the content's suitability and its ability to resonate with the needs of potential users.

Through this comprehensive evaluation, the consortium unearthed valuable insights and identified areas primed for enhancement, diligently documenting their findings for each partner country. Equipped with this invaluable feedback, the partners returned home, fueled with determination to elevate their contributions to the project.

Looking ahead, the consortium is now in the process of finalizing the modules and preparing for the highly anticipated official launch of the e-learning platform in the upcoming months. This platform will be made freely accessible, serving as a powerful tool to empower NEET individuals by equipping them with essential entrepreneurial skills.

Newsletter

As the Learning, Teaching, and Training Activity (LTTA) reached its third day, a whole new adventure unfolded. This day was all about exciting study visits to vibrant green entrepreneurial businesses nestled in the charming old town of Nicosia city. The photo above beautifully captures one such visit - a fascinating exploration of "Things Green," a remarkable business that has harnessed innovation and sustainability to revolutionize tree planting methods.
